Any incoming optical power ranging from  $-65$  dBm to  $-40$  dBm will affect the OTDR acquisition. The way the acquisition will be affected depends on the selected pulse width.

Optical power meter EXFO's high-level power meter (GeX) can measure up to  $27$  dBm, the highest in the industry. This is essential for hybrid fiber-coaxial (HFC) networks or high-power signals.

The OTDR manual provides detailed instructions on the operation and configuration of the Optical Time Domain Reflectometer, including safety warnings and battery care.
