Russia debugs 10G optical core router

FBI and Cisco warn Russian hackers are exploiting a 7-year-old Cisco Smart Install vulnerability on outdated routers and switches worldwide.

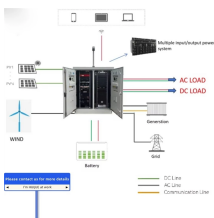

Microsoft Threat Intelligence reported that Russian state-sponsored group Forest Blizzard (APT28) is behind a large-scale attack targeting TP-Link routers. The group has compromised more ...

The U.S. Department of Justice, FBI, and international law enforcement partners recently disrupted a GRU network of compromised small-office home-office (SOHO) routers used as part of ...

To hijack the routers, the attackers exploited older models that hadn't been patched against known security vulnerabilities. They then changed DNS settings for select domains and used ...

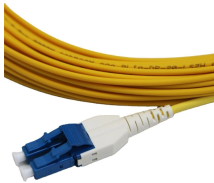

Hackers linked to Russia's military intelligence units are using known flaws in older Internet routers to mass harvest authentication tokens from Microsoft Office users, security experts warned...

FORT MEADE, Md. (April 7, 2026) -- The National Security Agency (NSA) and other agencies today co-sealed a Federal Bureau of Investigation (FBI) public service announcement, "Russian GRU...

The National Cyber Security Centre (NCSC) - a part of GCHQ - has published a new advisory revealing how Russian cyber actors have compromised commonly used routers, allowing ...

The U.S. Department of Justice and the FBI recently disrupted a GRU network of compromised small-office home-office (SOHO) routers used to facilitate malicious DNS hijacking ...

Announced on April 7, 2026, the technical operation neutralized thousands of compromised small office/home office (SOHO) routers that were hijacked by Russian military intelligence to spy on global ...

"GRU actors compromised routers in the US and around the world, hijacking them to conduct espionage. Given the scale of this threat, sounding the alarm wasn't enough. The FBI ...
