

Slovenian Mining Spectrometer

Slovenian Mining Spectrometer

The combination of low infrastructural demand and high analytical performance of Epsilon 4, enables quick determination of operation strategies in mining locations where utilities are limited.

SPECTRO's advanced analyzers are unmatched in the mining and geochemistry industries, offering precise elemental analysis for exploration and production.

Spectral Evolution's field portable NIR spectrometers are designed to resist the most demanding conditions of the mining environment. Combined with the EZ-ID™ mineral identification software and ...

Slovenia Atomic Absorption Spectrometer Market is expected to grow during 2023-2029

Unlock mining value, from exploration to operation and mine closure, with comprehensive testing, inspection, certification and consulting services from SGS. Find out more.

A member of the AMETEK Materials Analysis Division, SPECTRO is one of the worldwide leading suppliers of analytical instruments, employing optical emission and X-ray fluorescence spectrometry ...

Hosted in the beautiful city of Naples, the event features a robust program of hands-on learning and structural biology workshops designed for PhDs and postdocs. full event details and registration are ...

David specifications before the 2020 upgrade are listed.

Spectral Evolution's field portable NIR spectrometers are designed to resist the most demanding conditions of the mining environment. Combined with the EZ-ID™ ...

Slovenian NMR centre is a national facility open to academic researchers and researchers from industrial partners who require the use of high-field high resolution NMR spectroscopy in solution or ...
