

# Standards for laying ground cable trays

## Overview

The National Electrical Code (NEC) lays out specific guidelines regarding which cables are permitted for use in these trays, ensuring safety and compliance with industry standards. These systems provide an efficient and adaptable solution for managing a wide range of cables, including power cables, control cables, Ethernet, and fiber optic lines. The flexibility and scalability of cable trays make them an ideal choice for environments where cable density and organization can. These excellent records are the result of cable tray's unique features plus the proper design and installation of the cable tray wiring systems. The intent of this article is to review grounding practices for cable tray wiring systems.
