Learn how to strip wire with our step-by-step instructions, covering various wire types and tools for safe and efficient cable preparation.

Its biggest advantage is self-adjustment to the cable diameter. Just insert the wire into the jaws and squeeze the handles. The tool automatically scores the insulation and strips it off in one ...

That tool works by cutting the insulation in one point, and then pulling the cut apart, exposing some of the metal but without actually removing any insulation.

For a short section, $\frac{1}{4}$ " or 6mm, I would just cut the insulation with wire stripper and tug the insulation to create the gap. For a longer section, I would make two cuts and slice the insulation ...

Maintaining firm pressure, the stripper is then pulled straight off the end of the wire, sliding the scored insulation cleanly away from the metallic core. A successful strip results in a ...
