

Taiwan Galvanized Rainproof Large-Span Cable Tray

Taiwan Galvanized Rainproof Large-Span Cable Tray

Engineered for long distance cable routing, long-span cable tray offers high load capacity and strong structural durability for industrial applications.

Conduit fittings used in electrical conduit system from the overhead service entrance to machinery, and apply to many areas such as construction site or metro transit system.

Cable tray is mainly made of welded stainless steel or galvanized steel with high tensile strength. It is ideal for environments need to organize massive amounts of cable. The large open mesh holes ...

Widely used in electric, automobiles and construction industries; our Hot Dip Galvanized Cable Trays are sure appreciated by customers for its robust construction and capacity to withstand adverse ...

Large span cable tray is assembled by pultruded FRP profiles. Large span cable trays can be divided into ladder style, channel style, perforated style with galvanized, powder coated surface to resist ...

These trays are appropriate for carrying heavy cables and offer great strength, durability, and load-bearing capacity. They are commonly used in construction, oil and gas industries, maritime ...

Thanks to innovation and improved technology, we have evolved into a one-stop shop for Cable Tray manufacturers. Our highly educated expert closely monitors every aspect of manufacturing and ...

We offer top-notch Galvanized Cable Trays in Taiwan. These metal trays, coated with a special zinc shield, resist rust and last a long time, even in tough environments. They keep your wires tidy, cool, ...

It is suitable for laying scenarios with relatively large span requirements, and tries laying control cables for computers, communication cables, thermocouples and other sensitive systems.

The hot dipped galvanized cable ladder is a reliable and robust solution for cable management. Its corrosion resistance, durability, and customizable options make it suitable for a wide range of ...
