

The elevator electrical control box is located at the entrance

Overview

The elevator equipment room for a hydraulic elevator is located on the lowest floor closest to the elevator shaft. A (n) ____ shall be located at the point of entry to an elevator machine room. The correct answer is: b) lighting. Overcurrent devices and disconnects must be located in machine or control spaces, be lockable and provide a single means to disconnect ungrounded conductors, with selective coordination for multi-elevator feeders. Conductor and wireway fill, approved flexible traveling cables and secure supports. To address this issue, Code Making Panel (CMP) 12 of the National Electrical Code® acted on several proposed changes to Article 620 during the revision cycle for the 2017 NEC that deal with the proper installation of elevator controllers. Heating pipes shall convey only low pressure steam (5 psi (34 kpa) or less) or hot water (212o F (100o C) or less). Each manufacturer has specific requirements for providing power and maintenance access to the equipment.
