

Two companies share one splitter

Overview

Stock splits are just simple arithmetic, altering the share count to influence the stock price. Amazon (AMZN) recently split its stock; Alphabet (GOOG, GOOGL) and Shopify (SHOP) will do the same soon. A stock split is a decision by a company's board to increase the number of outstanding shares in the company by issuing new shares to existing shareholders in a set proportion. Choosing the right structure helps ensure transparency, fairness, and long-term business success. Think about a stock split like a chocolate bar. Uncover the. There are splitters that take the four pairs of wire within an ethernet cable and split them between two sockets with two pairs each. Side note: you will need one on each end of the single cable. A gigabit switch, like xbiker12 said.

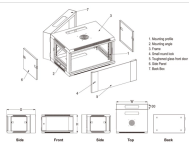

Two companies share one splitter

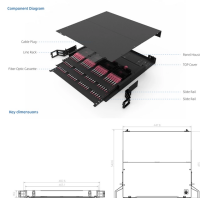

When a stock price gets high, sometimes a public company will want to lower that price and can do that with a stock split. A stock split is a decision by a company's board to increase the number of ...
