

## What are the high requirements for national standard computer room power distribution boxes

### Overview

Choose the right box based on environment (indoor/outdoor), load capacity, and durability. Check for proper IP/NEMA ratings and material quality. Article 645 of the National Electrical Code provides specific requirements that must be met before the rules in Article 645 can be applied to an IT room. 10; (2) a separate HVAC system is provided for the room, or another system in another area is used if fire/smoke dampers which operate from smoke detectors and operate. (6) Only electrical equipment and wiring associated with the operation of the IT room is installed in the room. These rules address the equipment that forms the core of a premises electrical system. Ensure safe placement: install in dry, accessible areas with good ventilation and at appropriate height (typically ~1. Practice good wiring: secure.
