

What are the reasons for blackening of the primary distribution box

Overview

The five causes are: a settled or tilted box, outlet clogs from solids carryover, root intrusion or crushed laterals, cracked or deteriorated box structure, and a saturated drainfield that mimics D-box symptoms. Our lines were divided into 4 separate 50' lines fed by the distribution box, which is a standard concrete design with no baffle. We are conservative in our water usage and particularly careful to not rinse solids or grease down our drain. Clogging If you've had your septic system for a while, you have probably run into clogs from time to time. You might have even experienced backups in the system. Fixes range from jetting clogged outlets. Septic tank distribution boxes play a crucial role in the functionality of a septic system. They serve as the intermediary between the septic tank and the drain field, ensuring that effluent is evenly distributed across the leach lines.

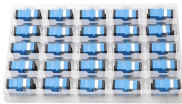

What are the reasons for blackening of the primary distribution box

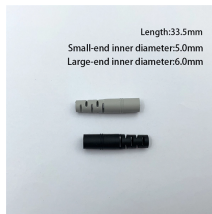

to think or argue in a logical manner. to form conclusions, judgments, or inferences from facts or premises. to urge reasons which should determine belief or action. Synonyms: persuade
