

## What is the cost of a telecommunications tower

### Overview

On average, the total cost to build a cell tower in the United States is \$250,000, while in Western Europe it is \$135,000, and in Latin America it is \$110,000. Cell tower build costs can vary significantly depending on the site location and terrain, as well as the type and height of the tower. A standard 40-meter lattice tower might cost significantly less than a camouflaged monopole of the same height due to design. A cell tower lease is a legally binding real estate contract between a property owner and a wireless carrier or tower company that grants equipment placement rights in exchange for monthly rent. Landlords. What are typical cell tower lease rent rates in California?

Most California tower and rooftop leases fall between \$2,060 and \$3,980 per month, with higher rents in Los Angeles, San Diego, San Jose, San Francisco, and fast-growing inland markets when renegotiated with accurate data.
