

## Where is the AI computing server in Austria

### Overview

Google has started construction of its first Austrian data center on 50 hectares to support cloud services and AI, pledging 100% clean energy by 2030. A new, large-scale initiative called "AI Factory Austria" (AI:AT) will have a lasting positive impact on the Austrian artificial intelligence (AI) ecosystem. As officially announced on 12 March 2025, funding has been secured through the EU's European High Performance Computing (EuroHPC) Joint. The AI Factory Austria AI:AT supports customers as an independent, trustworthy partner in using AI effectively - through sovereign infrastructure, hands-on expertise, enablement, embedded in an ecosystem of research, startups and industry. May, 2026 Artificial intelligence, European. Vienna - Strengthening its tech stronghold in Europe, Google has officially broken ground on its first data center in Austria, located in Upper Austria. Obviously, by May 2026, the company is racing to meet the "insane" demand for cloud computing and AI solutions. The project covers a massive 50.

## Where is the AI computing server in Austria

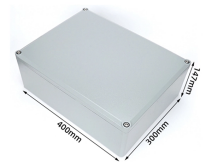

Building on the Vienna Scientific Cluster (VSC), a new AI-optimised supercomputer will be acquired, which will be available to researchers, start-ups, companies and public administration. This ...

Die AI Factory läuft vollständig im Raiffeisen Rechenzentrum in Graz. Dort werden alle KI-Modelle und Daten sicher verarbeitet – ohne US-Clouds, ohne externen Zugriff. So bleibt alles zu 100 % in ...

Die AI Factory Austria stärkt das nationale KI-Ökosystem nachhaltig, indem sie Unternehmen, Forschenden und Start-ups den Zugang zu leistungsfähiger, vertrauenswürdiger KI-Infrastruktur ...

Vienna – Strengthening its tech stronghold in Europe, Google has officially broken ground on its first data center in Austria, located in Upper Austria. Obviously, by May 2026, the company is ...

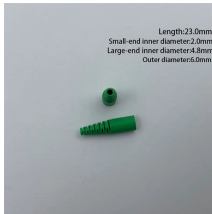

Die „AI Factory Austria“ (AI:AT), die das heimische KI-Ökosystem rund um Forschung, Unternehmen und öffentliche Institutionen stärken soll, steht bereits in den Startlöchern, wie die...

Mit der österreichischen AI Factory manifestiert sich ein Leuchtturmprojekt des KI-Umsetzungsplans. Die Stärkung des KI- und Digitalstandorts Österreich ist ein zentrales Ziel der österreichischen ...

Die Universität Innsbruck als Landesuniversität der Bundesländer Tirol und Vorarlberg beschafft aktuell einen neuen Quanten-Computer, der künftig an "MUSICA" angebunden werden soll, um dadurch ...

Vienna-based AI startup relocates together with Trending Topics to Austria's national platform for applied AI and European high-performance computing / AI:AT strengthens the interface between AI ...

The AI Factory Austria (AI:AT) aims to be a one-stop-shop for Austria's AI ecosystem. It will establish a state-of-the-art AI-optimised supercomputer infrastructure and a physical AI hub offering community ...

„Der Aufbau der AI Factory ist ein wichtiger Meilenstein auf dem Weg zu einem hochleistungsfähigen KI-Ökosystem am Innovationsstandort Österreich. Mit diesem Vorhaben ...
