

## Which industry are optical modules and AI

### Overview

Powered by the dual engines of AI and cloud computing, the optical module industry is evolving from a support role into strategic infrastructure. 6T modules for core data centers or high-density deployments at the edge, demand is exploding across the board. As hyperscale AI data centers continue to scale. TrendForce's latest research indicates that the global market for AI-focused optical transceivers has entered a phase of rapid growth, with market size projected to expand from US\$16.5 billion in 2025 to \$26 billion in 2026, representing over 57% YoY growth. This surge is driven not only by:

- AI infrastructure race fueled a Capex surge in 2024 to approximately \$200bn
- 2025 Capex Projection to near \$350bn and 2030 Capex projection to near \$545bn
- Capex funding facilities expansion, xPU acquisition
- Expectations of continued growth through 2030 with generative AI adoption both at the

With 1. Yole Group attended OFC 2026 with a dedicated team of analysts on site, actively engaging with major players in the photonics. In July 2025, LightCounting released its Cloud Data Center Optics Report, revealing that cloud companies' increasing investments in data center and network infrastructure have created a highly dynamic new segment within this market.

Because AI workloads surged from 2023 to 2025, demand for.

## Which industry are optical modules and AI

Explore optical communication industry trends in 2026, driven by AI infrastructure, 800G and 1.6T optical modules, silicon photonics, and next-generation data center connectivity solutions.

TrendForce's latest research indicates that the global market for AI-focused optical transceivers has entered a phase of rapid growth, with market size projected to expand from ...

-The AI providers will have very limited last mile access to enterprises and minimal "AI middle mile". -Communications SPs (CSPs) own many customers relationships within the total enterprise ...

The optical module industry stands at a pivotal moment. Driven by explosive AI growth, the market is experiencing unprecedented demand, rapid technological evolution, and fundamental ...

The optical communications industry is shifting from traditional telecom cycles to structural growth driven by AI data center demand. As AI clusters expand and high-performance computing ...

The Global Optical Module for AI Market is segmented by type into Transceivers, Active Optical Cables, Modules, and Optical Amplifiers, each catering to specialized applications within the ...

Powered by the dual engines of AI and cloud computing, the optical module industry is evolving from a support role into strategic infrastructure. Whether it's 800G/1.6T modules for core ...

The global AI optical module market grew from RMB 600 million (USD 90 million) in 2020 to RMB 6 billion (USD 900 million) in 2024, achieving a compound annual growth rate (CAGR) of ...

The Optical Module Market is entering a stage of rapid expansion, as global AI clusters continue to scale at an unprecedented pace.

With 1.6T gaining momentum and 400G/lane, the industry is moving beyond component innovation toward power-efficient, integrated, and deployment-ready optical architectures. Yole ...

## Contact Us

For more information, pricing, or custom data center solutions, please contact us:
