

## Which is more durable fiber optic FC or SC connectors

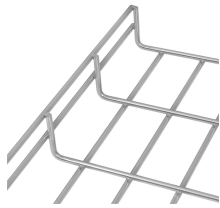

### Overview

Durability and Security: FC connectors are generally considered more durable and secure due to their threaded design. Of the more than a dozen types of fibre-optic connectors available, the four most commonly used today are LC, SC, FC, and ST. This comparison focuses squarely on the four most common field connectors — LC, SC, ST, and FC — so you can pick the right tool. A fiber optic connector is a mechanical device that allows two fibers to be joined precisely, enabling light to pass with minimal insertion loss and reflection.
